\* Per MHCC: This data comes from two different reports. One is the actual orders sent to warehouse. This report is where SOC Operations pulled a sample of what entities are being sent PPE. SOC Operations also pulled the number of Tribal orders and PPE amounts from this report. From the second report, SOC Operations pulls the total number of orders in SF and subtracts the total from the day before to get the delta. Total number of orders includes cancelled orders, completed orders, and those orders still in the approval process, which can take up to a few days before going to warehouse; therefore, the delta will most likely never match the number of orders provided in the sample.
